Mr. West, the chief of the corps of postoffice inspectors, was asked if any steps had been taken by the department officials to investigate the circumstances in connection with the mailing and delivery of the now famous Murchison letter. He says the department has taken no action in the matter, and it is not probable that it will. There is not one person in 100 of the miliions who travel on railroads in the course of a year who has any idea of the speed of a train. A large per cent. of even the regular trainmen of the country cannot tell with any degree of accuracy how fast a train is running. Frequently engineers are dispatched on a trip over a line of railroad with instructions to run at a speed of a certain aumber of mlles an hour. The ongineers do not carry a speed indicator, but have learned by various methods to gauge their engines so as to make only the slightest variation from their

The majority of engineers use their driving wheel as a gauge. They know its circumference, and by counting its revolutions within a certaia time can teli very accurately the speed at which they are running. Another method is to time the run between mile posts, and still another is to make calculations from the number of telegraph poles passed in a certain time. These poles, in a level country, and where four or five wires are used, are spaced so that they are thirty to the mlie. If only a single wire is used they are spaced from twenty-live to tweuty-eight to the mile.

The most accurate method, and the one most in use by experienced raliroad men, is to count the number of rail joints the train fuichi so with an ax that his recovery is very passes over in twenty seconds. The rnils in doubtful, nearly all cases are thirty feet in length, and the number passed over in twenty seconds is the speed per hour a train is running. For instance, if a passenger sitting in a sieeper can count thirty clicks of the wheels on a rail joint in twenty seconds the train is running at the speed of thirty miles an hour.-Kansas City Times.

## POLITICAL EXCITEMENT.

A Law That May Disfranchise a Lurge

Number of New York Voters. NEW YORK, Oct. 31. -Some fittle excite: ment has been caused in political circles by the published statement that the laws of 1857, chapter 280, relating to the legal holidays and the closing of public offices would disqualify all who had registered after 13 o'clock on Saturday afternoon. It was couceded by a number of prominent lawyers, who were seen by a United Press reporter, that the various registration offices were public offices, and thus the inspectors were public office holders for the time being. None of these jurists, however, would give a decided opinion, and the question seems to have thoroughly stirred up the lawyers of this city.

David J. Deane, first assistant to Corporatioa Counsel Beelman, said: "The questioa is certainly a novel one and must be decided by the courts. He will vote to continue a system that is making the rich richer and the poor. poorer, that is making millionaires out of the few and paupers out of the many.

Workingmen, you who toil from daylight till dark in order to keep body and soul together, will you vote to continue such a system any longer? It is taxing the people millions of dollars every year more than the government needs. It is taking these millions out of circulation where they belong, and locking them up in the vaults of the treasury where they can do no one any good.

This system is iniquitous, it is unjust, it is burdensome, it is full of inequalities. The Republicans pledged themselves as

#### FOREWARNED.

Republican Racket Given Away by the Bungling of Their Executive Committee.

A Sardis Democrat Gets a Confidential Circular From Davis and Wadsworth.

"Forewarned is forearmed."

The Republicans are engaged in a quiet determined and desperate effort to elect Burchett and retain control of the Ninth Congressional district.

If any Democrat has doubted this, the proof is at hand to set the matter completely at rest. And the funny part about the whole business is that the thing has been given away by the bungling of the Republican Executive Committee.

Messrs. Thomas A. Davis and W. H. Wadsworth, Jr., are the bunglers.

Mr. Nathan Campbell, of Sardis, says he has always been a Democrat. Hence one can imagine his surprise when, a few days ago he received the following interesting document by mail:

HEADQUARTERS MASON COUNTY EXECUTIVE COMMITTER, MAYSVILLE, KY., October 20, 1888.

My Dear Sir: The National election and the election for Congressman is rapidly approaching. Remember that Tuesday, November 6th, 1888, is election day. Your special efforts are particularly requested and urged in organizing the Republicaus in your precinct, and in getting to the polis every man who will vote for Harrison and Morton for President and Vice President, and for Drury J. Burchett for Congressman. Hee that our vote is gotten out in your precinct. Let the work go on quietly but energetically. Truly your friend, THOMAS A. DAVIS, Chairman.

W. H. WADSWORTH, JR., Secretary. The following from Mr. Campbell shows that the Republicans struck the wrong man when they wrote to him:

BARDIS, KY., October 29, 1888. Editor Bulletin-Sir; Enclosed you will find letter addressed to me. It must be a mistake, as I inve always been a Democrat and see no cause to forsake the porty now. You can do as you please with this letter, as I have no use for it. Yours, NATHAN CAMPHELL.

The letter from Messrs. Davis and Wadsworth shows that it has been bectographed, and no doubt hundreds of copies of it have been distributed throughout this county.

The letter shows that the Republicans are "quietly and energetically" at work. Let the Democrats profit by the knowledge they have gained. They are waging a vigorous campaign, but from now on till the polls close they should renew their efforts and fight with redoubled energy.

See that every Democratic vote is polled next Tuesday, and the rout of the Republicans of the Ninth district will be complete.

Let the work go on not only "quietly and energetically" but with that vim and vigor that rolled up a majority of nearly 1,200 last August for Sheriff-elect Alex-

The Expression "Ferdinand Must Go" No Longer Heard.

WAR THE ONLY MEANS OF OBLITER-ATING THE BALKAN STATE.

By Kindness the Prince Has Seenred the Support of the Balkan People-Revolting Story of Cannibalism From Africa. Marriage of Boulanger's Daughter, Other Foreign News Notes.

London, Oct. 31.-The expression "Prince Ferdinand must go," which was a few months ago heard in official circles ia almost every capital in Europe, is uo longer prevalent, but instead there seems to be a general belief though not so often or so loudly voiced,

that Prince Ferdinand will stay. Nothing, indeed, short of a great European war, which shall obliterate all of the Baikan states from the map of Europe, as distinctive governments can now onst this, not iong ngo derided, and, in some quarters, despised prince, from the firm position he has secured in the hearts of the people he rules or undermine the growing respect of the powers for his bravery, patriotism and statesman-like qualities. Entering Bulgaria, as he did, nmld the turbulence succeeding a revolution which had deposed and expatiated a ruler of acknowledged force of character and military capacity, Prince Ferdinand, effeminate in appearance and manner, encountered opposition of a nature and streagth calculated to dishearten a much more experienced man, as well as one vastly; more powerful in physical and mental resources. Nobody believed that he could hold his throne three months, and nobody, except possibly Austria, cared whether he did or not.

The Russophiles in Bulgaria, and there were many, laughed at him and the so called regency welcomed him only as a tool to be used in whatever direction seemed best for their own interests. To the surprise of the former and the consternation of the latter the bangled and braceleted Cobourg prince immediately gathered up the reins of government and has since held them tightly.

From his own private fortune he has contributed and loaned large sums to the development of industrial interests and for the purpose of inaugurating and completing public works, and taking advantage of the popular favor into which he sprang from having done this, he has made tours of ohservation through the country which have been highly profitable to himself in the popular enthusiasm resultant, and the knowledge hé has gamed.

Instead of permitting himself to be frightened and detorred from his purpose by the There was an excitement and threats of fulminations of the ezar and the machina: lynching were made, tions of his agents, he has bidden them both a mild but firm deflance and applied hunself with increased zeal to the work of securing to himself the admiration and respect of the people, until now he is in a position to declare in response to the oft repeated demand for his abdication that Ferdinand will not go, in which declaration he will be supported by his people.
